Shrutika Dayalkar

FrontEnd Developer

shrutikadayalkar1@gmail.com | +91 9561479448

As a detail-oriented and results-driven Frontend Developer, I specialize in building responsive, user-friendly websites and applications using modern web technologies. I am proficient in HTML, CSS, JavaScript, and various frontend frameworks (e.g., React), and I am passionate about creating seamless, interactive user experiences. With a strong understanding of cross-browser compatibility, performance optimization, and accessibility,

Experience

Pinnaple Technology pvt ltd

Griffon Cruise Project *2025 - 2026*

- Led the development of a Griffon Management System, managing both frontend and backend components to streamline operations and improve user experience for the organization.
- Coordinated with cross-functional teams to establish coding standards, architecture best practices, and reusable components to ensure the maintainability and scalability of the platform.
- Integrated payment systems, user authentication, and email/SMS notifications, enhancing both the backend functionality and the frontend experience.

Pinnaple Technology pvt ltd

Cruise Booking Project *2025 - 2026*

- Led the development of a Cruise Booking System, managing both frontend and backend integration to deliver a seamless user experience.
- Spearheaded the frontend development using React.js to create dynamic, responsive UI components for booking options such as dates, seats, baggage, and meals.
- Established coding standards, best practices, and reusable components to improve system scalability and maintainability.
- Collaborated with cross-functional teams including designers, QA engineers, and product managers to align the technical requirements with user needs, delivering a customer-centric solution.
